

Teknon — Bringing 30 years of low voltage cabling expertise to you

There's a reason Teknon has been around for close to 30 years. Our clients have come to rely upon us for our deep attention to detail and high levels of technical and installation expertise.

With a complete low voltage systems offering, including design and installation of structured cabling systems, security WiFi and DAS, Teknon consistently delivers quality work on-time and within budget.

Our experienced and talented project managers are hands-on at all times and most are BICSI RCDD certified with over 15 years of experience.

Teknon also has a dedicated staff of field technicians, many of whom have over ten years of tenure with us. Both project managers and field technicians are highly focused on maintaining our stringent quality and safety standards.

When it comes to safety, you are in good hands. Our experience and precision have earned Teknon one of the best EMRs in the market and numerous safety awards. And that's something we're extremely proud of.

Teknon offers these low voltage design, installation and maintenance services:

- Structured Cabling Networks, including voice & data and fiber optics
- Wireless LAN support of devices such as laptops, tablets, smartphones, iPads, gaming devices and eReaders
- Access Control Systems, including card access, keyfobs and biometric solutions
- IP Video Surveillance (CCTV)
- Distributed Antenna Systems (Emergency responder and in building cellular)
- Intrusion Detection
