

YOU wouldn't leave your house

half-dressed ...

Why leave your

cables
that way?

**Introducing
SoftCinch® Velcro®
Cable Management
Products from
Leviton Telcom**

An end-to-end cabling system calls for quality end-to-end cable management.

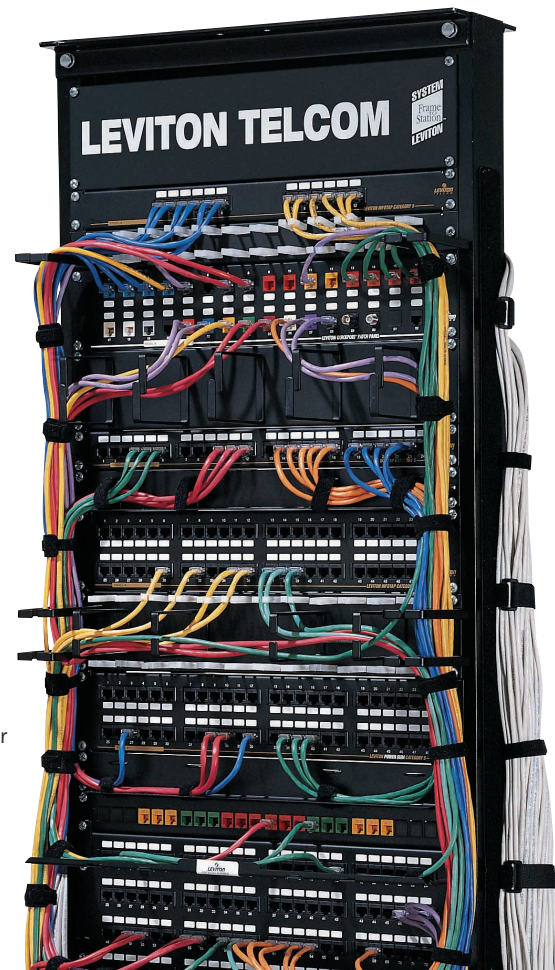

When installing and specifying systems, demand SoftCinch Velcro Cable Management products. They'll protect and route your cables from the equipment rack all the way to the workstation. Velcro is easy on your cables, making it virtually impossible to over-tighten them. And Velcro is reusable, making adds, moves and changes as easy as, well, getting dressed!

A few of the SoftCinch® Velcro® products available are:

- **POLYWRAP CABLE TIES** in pre-cut lengths or in bulk rolls.
- **THE SPACEMAKER** is the ideal way to tame over-crowded telecom racks because it uses no rack space whatsoever.
- **THE DESK CABLE ORGANIZER** prevents tangled wires and cables at work areas.
- **THE PLENUM-RATED POLYSLING** is a Velcro J-hook that accommodates different size cable bundles.

Keep your cables fully dressed.

Call us today at 800.922.6229, for more information on the SoftCinch® Velcro® line from Leviton Telcom.

**DRESS YOUR CABLES IN STYLE WITH
SOFTCINCH® VELCRO®**
